ACTA PHYSICA HUNGARICA

EDITORIAL BOARD

Z. BAY, R. GÁSPÁR, I. GYARMATI, N. KÜRTI, K. NAGY, L. PÁL, A. SZALAY, P. SZÉPFALUSY, I. TARJÁN, B. TELEGDI, L. TISZA, E. WIGNER

EDITOR-IN-CHIEF

I. KOVÁCS

VOLUME 61

AKADÉMIAI KIADÓ, BUDAPEST
1987

CONTENTS

Volume 61

n memoriam Zoltán Gyulai. *I. Tarján* 143

ENERAL PHYSICS

ressure dependent e.m.f. of thermocouples. *A. Haas* 297

n the classification of infinitesimal transformations. *P. G. C. Rio-Preto* and *J. D. M. Vianna* .. 369

LEMENTARY PARTICLES AND FIELDS

rotating mass in Gödel universe with an electromagnetic field. *L. K. Patel* and *Sharda S. Koppar* 363

TOMIC AND MOLECULAR PHYSICS

Применение метода комбинационного рассеяния гля исследования гетерогенного катализа. *А. Бобров, Я. М. Кимельфельд, Л. С. Глебов, Г. А. Клигер и Б. М. Локтев* 5

ependences of correlation corrections for 4f shell levels energy on its occupation number. *G. L. Zukauskas* and *P. O. Bogdanovich* 9

tudy of the collisional broadening of the bismuth line 648 nm hyperfine components by Faraday rotation spectroscopy. *Yu. V. Bogdanov* and *S. I. Kanorskii* 13

high temperature micropinch plasma as a spectral source of multiply charged ions in the region $\lambda < 0.1$ nm. *E. Ya. Gol'ts, L. A. Dorokhin, K. N. Koshelev, A. E. Kramida, A. A. Palkin* and *Yu. V. Sidelnikov* 17

nfrared study of hydrogen chemisorbed on W (100) by surface electromagnetic wave spectroscopy. *G. N. Zhizhin, M. A. Moskalova, P. A. Shafranovskii* and *B. R. Shub* 19

lodern aspects of measurement technique for excited state spectroscopy. *W. Becker, E. Klose, D. Leupold* and *H. Stiel* 23

aman spectra of silicates. *W. Pilz* 27

Инфракрасная спектроскопия цеолитов. *Кр. Пойкер* 31

nvestigation of molecules by the methods of resonance coherent light scattering. *P. A. Apanasevich* 35

Научный приборный комплекс для исследования сверхбыстрых явлений в оптической спектроскопии. *Н. Кемпе и Х. Зндерт* 39

pectroscopy of diazines soluted in aqueous and protic solvents. *F. Billes, A. Tóth* and *M. Gál* . 43

ontact transformations in the mixed matrix-operator form: effective rotational Hamiltonians for the excited vibrational states of symmetric top molecules. *S. Urban, M. Garcia Hernández* and *D. Papousek* 47

lectronic spectra of diatomic molecules containing f-elements: GdO, EuF and UO. *Yu. N. Dmitriev, L. A. Kaledin, A. I. Kobyliansky, A. N. Kulikov, E. A. Shenyavskaya* and *L. V. Gurvich* . 51

evelopments of some solid state NMR spectrometer components. *L. Pócsik, J. Lasanda, F. Tóth, P. Bánki, G. Kroó* and *M. Juhász* 55

Picosecond spectrochronography of pure and impurity crystals secondary radiation. *J. Aaviksoo, A. Feiberg, P. Saari* and *T. Tamm* 59

Rotational contribution to the vibrational bandshape of ordered systems. *N. Kirov, I. Dozov, M. P. Fontana* and *B. Rosi* 63

Современное состояние микроволновой спектроскопии. *Б. С. Думеш* 67

FT — IR spectroscopy in catalysis. *J. Mink* 71

Picosecond studies of relaxation processes in semiconductors. *H. Bergner, V. Brückner, L. Leine* and *M. Supianek* 75

Application of atomic spectroscopy to trace analysis. *K. Dittrich, B. Hanisch* and *H.-J. Stärk* .. 79

Application of spectroscopic methods in the polymer industry (Results and problems) *W. Kimmer* 83

Automated stabilized tunable CO_2 laser spectrometer designed to study molecule parameters. *L. N. Orlov* and *V. V. Nevdakh* 87

Селективная спектроскоппя пигментов бактерий в твердотельных матрицах. *И. В. Ренге, К. Х. Маурииг, Р. А. Аварлаа* 91

Спектры и кинетика замедленной флуоресценции органических молекул в твердых растровах при селективном импульсном возбуждении. *Ю. В. Романовский, С. Г. Куликов* и *Р. И. Персонов* 95

Spectral dependence of light-induced change in dye solution refractive index. *V. V. Kabanov* and *A. S. Rubanov* 99

Investigations of surface polaritons in the Ag-GaAs system. *L. V. Belyakov, D. N. Goryachev, O. M. Sreseli* and *I. D. Yaroshetskii* 103

Luminescence of excitonic surface polaritons in CdS crystal. *V. V. Travnikov* 107

Application of the method of irreducible tensorial operators to study the expansion of stationary perturbation theory. *G. A. Gaigalas* and *G. V. Merkelis* 111

Some results of analytical atomic spectroscopy from the GDR. *H. Falk* 115

Лазерный атомно-флуоресцентный анализ с вакуумной электротермической атомизацией. *М. А. Большов, А. В. Зыбин, В. Т. Колошников* и *И. И. Смиренкина* 119

How to build up an up-to-date decay time spectrometer for the nanosecond region. *J. Szőke, L. Tóth, P. Szőke* and *C. Sándorfy* 123

Application of the new method for ENDOR studies of disordered systems. ^{14}N ENDOR study of powdered sample of BIS (8-mercaptoquinoline)oxovanadium (IV) magnetically diluted in the corresponding In (III) host lattice. *N. D. Yordanov* and *M. Zdravkova* 127

Study of triplet exciton interaction in molecular crystals. *A. A. Delyukov, G. V. Klimusheva* and *A. V. Turchin* 131

New measurements of sub-millimetre-wave rotational transitions for the ketene (H_2CCO) molecule. *L. Nemes, J. Demaison* and *G. Wlodarczak* 135

Excitation and emission spectra of undoped potassium chloride phosphors *N. L. Kekan* and *N. A Patil* 277

Theoretical investigation of fluorocarbonylsulfenyl chloride using infrared and Raman spectra. *A. Natarajan* and *P. Kolandaivel* 289

Reinvestigations on the electronic transition moment variation in ($A^2\Pi$—$X^2\Sigma^+$) and ($B^2\Sigma^+$—$X^2\Sigma^+$) band systems of BO molecule. *Veerappa M. Mummigatti* 343

FLUID DYNAMICS, FLUIDS, PLASMAS AND ELECTRIC DISCHARGES

Hydrodynamics in curvilinear coordinates. *B. Kämpfer* and *B. Lukács* 317

Velocity of mass flow in the temperature maximum in a magnetically deflected wall-stabilized electric arc. *J. Ramos-Barrado* 357

CONDENSED MATTER

Contact resistance profiling of LPE grown GaAs-(GaAl) As multilayer structures. *L. Csontos* and *Gy. Hoffmann* 145

GaAs/GaAlAs multilayer structures grown by LPE method. *T. Görög, E. Lendvay* and *V. Rakovics* 149
Optimization of flux composition for thick YIG layers. *B. Keszei, J. Vandlik, P. Görnert, R. Hergt, N. Wendt, K. Fischer* and *E. Sinn* 153
Growth of cadmium phosphide films by hot wall epitaxy. *K. R. Murali* and *B. S. V. Gopalam* .. 157
Computer aided modelling of VPE growth process of GaAs. *I. Mészáros, I. Gyuró* and *K. Somogyi* 161
GaAs VPE layers for microwave Schottky tuning varactors. *I. Gyuró* and *Zs. J. Horváth* 165
Hall mobility lowering in GaAs epitaxial layers. *K. Somogyi* 169
The NPM model as a practical guide to study the incorporation of dopants into single crystals grown by the Czochralski technique. *K. Raksányi, S. Erdei, I. Cravero, B. Vajna* and *A. Mecseki* 173
Simulation of Czochralski bulk flow under vertical magnetic field. *Gy. Szabó, Z. Juhász, J. Paitz* and *J. Pöltl* 177
CTR for growing crystals of transition metal silicides. The Ti-Si and Mo-Si system. *G. Krabbes, M. Ritschel* and *DO. V. Hoanh* 181
Effect of ultrasound on crystal growth from melt and solution. *V. S. Arakelyan* 185
Admissible manoeuvres in some crystal growth techniques. *S. Balint* and *Z. Schlett* 189
Bridgman growth in a shaped graphite furnace. *I. Nicoară* and *D. Nicoară* 193
Growth of potassiumdihydrogenphosphate (KDP) single crystals by means of thermoelectric cooler. *L. Vannay* 197
Growth of triglycine sulphate (TGS) crystals at constant growth rate. *L. Vannay* and *A. Tóth* .. 201
Growth of single crystals by means of membranes. *M. Varga* and *L. Vannay* 205
Correlation between growth mechanism and microsegregation studied by electron microscopy. *H. P. Strunk, A. Kessler, Y. C. Lu* and *E. Bauser* 209
The distribution of metaphosphate ion. A new critical impurity in $LiNbO_3$ single crystals grown by the Czochralski technique. *K. Raksányi, Á. Péter, Zs. Szaller, I. Fórizs* and *S. Erdei* 213
Electrooptic investigation of $LiNbO_3$ monocrystals. *Cs. Kuti, J. L. Presmanes* and *K. Polgár* ... 217
Microscopic observations of as-grown defects in lithium niobate single crystals. *L. Malicskó* ... 219
Characterization of $LiNbO_3$ crystals resistant to laser damage. *L. Kovács, I. Földvári* and *K. Polgár* 223
Complex microscopic investigations on the as-grown quality of bismuth germanate single crystals. *L. Malicskó* 227
The growth and some properties of doped $YA10_3$ single crystals. *B. Perner, Jiri Kvapil, K. Blazek, J. Horák, Josef Kvapil* and *B. Mánek* 231
IR spectra of some rare-earth iron gallium garnets. *E. Beregi* and *E. Hild* 235
Sc-ion distribution and dissolution forms of ScGaYIG single crystals. *E. Beregi, E. Hild, E. Hartmann* and *J. Lábár* 239
Peculiarities in shape of $FeBO_3$ single crystals in the Fe_2O_3-B_2O_3-PbO-PbF_2 system grown from the flux. *G. A. Petrakovskii, V. V. Rudenko, V. M. Sosnin* and *G. N. Stepanov* 243
KDP Q-switch with decreased piezooptic influences. *Cs. Kuti, T. Juhász, J. Bakos* and *L. Vannay* ..247
Growth of single-crystalline silicon films on insulating substrates. *W. Scharff* and *K. Hoeppner* . 251
Indium-silicon CO-doping effects in LEC — grown gallium arsenide crystals. *V. Rakovics, R. Fornari, C. Paorici, L. Zanotti* and *C. Mucchino* 255
Ferroelectric oxides and related substances: growth and study of single crystals. *Yu. N. Venevtsev* 259
SEM investigations of macroscopic crystal defects in GaAs VPE layers *I. Gyuró, L. Dobos, Zs. J. Horváth, E. K. Pál, V. I. Fineberg, R. V. Konakova* and *Yu. A. Tkhorik* 263
Characterization of chemically deposited Ag layer. *A. K. Abass, D. A. Mukhtar* and *N. R. Adnan* 281
On the ambiguity in the Bethe's Ansatz solution of one-dimensional models with linear dispersion. *Kazumasa Itai.* 309
Dependence of the laser output energy on the initial electron density in e-beam pumped TEA CO_2 laser. *A. M. Suhail* and *M. F. Kimmitt* 349

Centres responsible for 340 and 380 K glow peaks in NaCl: Sr. *R. V. Joshi, N. L. Kekan* and *N. A. Patil* 355

ASTROPHYSICS

Plane symmetric cosmological solutions of the Lyttleton Bondi Universe. *D. R. K. Reddy* and *P. Innaiah* 269

Neutron stars in the early Universe. *Callegari Gimmi* and *Bregola Mauro* 375

BOOK REVIEWS 379
